Arrakis #78
Nov. 4, 1977

This here is Arrakis, the seventy-eighth issue thereof. Subs to this literary rag are 1¢/page plus postage. Openings at present available in regular diplomacy and mastermind, and just about anything anyone might care to suggest. Gamefee for the diplomacy will be \$2.50 plus a sub; no one is signed up as yet since I just now decided to open another game.

Responsibility for this trash rests on:

David Head Box 1231, Huntsville, Ont. POA 1K0 705-789-5432

Doug Hayward Box 291, Huntsville, Ont. POA 1K0 705-789-5606

If you have a neurotic fear of getting peanut butter stuck to the roof of your mouth you probably are suffering from Arachibutyrophobia. Just thought you'd probably want to know.

Odds and Ends:

- 1/ Arachibutyrophobia is known to exist.
- 2/ For Sale: one inoperable fifty year old gestetner. Plans to use said machine in the future publication of Arrakis have been scrapped due to its suspect working condition and the inavailability of stencils. Instead I (Hayward speaking) have acquired John Gross' duplicator - once the mainstay of Janus. The future of the zine will now be stable once the presently used facilities become unavailable next year. At least one experimental issue or part-issue is likely before the actual changeover.
- 3/ I've decided to forget about the gamefee scheme for the postal Mastermind. Instead it will be free to anyone interested and maintaining a sub. Rules are in #16 or available on request. One person has signed up so far.
- 4/ Dave Grabar, I believe, is still looking for players in his self-designed game Nuclear Holocaust - WW III; some similarities to dip but with a larger number of players and on a larger scale. Write him at 4346 E. Armel Ct., Las Vegas, NV 89110, USA. Gamefee is \$5.00.
- 5/ Count Dracula Society, 334 W. 54th St., Los Angeles, Calif. 90037
... Founded in 1962 for the "serious study of horror films and Gothic literature". Student membership is \$7, nonstudent \$10. Sponsors the annual Mrs. Ann Radcliffe Awards for best in horror in cinema, literature, and television. The society has honoured Vincent Price, Peter Lorre, Lon Chaney Jr., Alfred Hitchcock, Rod Serling, Ray Bradbury, and Boris Karloff among others. It sponsors film conferences, film seminars, and other related activities in addition to publishing The Count Dracula Quarterly. Membership is presently 700 in 5 chapters.
- 6/ The lives of 70% of the world's population are unviolated by newspapers, radio, television, or telephone. Living in a progressive society entitles you to be subjected to this rag.
- 7/ More standbys are needed! The only requirement is that you sustain a subscription for the duration of the game. For the little effort involved you could pick up a pretty good position.

Press: Ankara-In Turkey's latest national election a democratic government led by Chris George won with overwhelming results. The country, which now has gone to war, is 87% behind their leader. Mr. George has been reported to have been given the army to organize, as well as the backward nation's government. He has stated recently that the Turkish army will be the one to beat.

Would Dave Grabar please submit standby moves for Italy. His address is on page one. Please note that the GM for this game is Hayward not Head. Fall 1901 is due on Dec. 2.

Fishy story dept.:

Flying fish can stay airborne for one thousand feet. Supported by air currents, they glide through the air simply because they can and they enjoy it.

Fish have been seen at 35,000 foot depths where pressure can be more than 1,000 atmospheres.

Candiru, South America tiny parasite fish found in the Orinoco and Amazon rivers, will enter the body of a swimmer through the lower body orifices. Unless detected and removed surgically they will ultimately reach the bladder and cause death.

Bonfish have tongues that can exert a crushing power of up to 60 pounds.

Piranha fish found in the waters of eastern and central South America swim and attack in schools of up to 1,000. They can strip a horse down to skeleton in minutes, will eat their own kind, and are themselves considered a delicacy.

Sturgeon is the largest freshwater fish and can weigh 2,250 pounds.

ORGANIZED CRIME IN THE US REPRESENTS ONE TENTH OF THE NATIONAL INCOME CRIME DOESN'T PAY??

Unusual Records Dept.:

The worst woman golfer - playing in the qualifying round of the Shawnee Invitational for Ladies at Shawnee-on-Delaware, Pa., in c. 1912, took 166 strokes for the 130-yard 16th hole. Her tee shot went into the Binniekill River and the ball floated. She put out in a boat with her exemplary, but statistically minded, husband at the oars. She eventually beached the ball 1 1/4 miles downstream, but was not yet out of the "woods". She had to play through one on the home stretch.

The most successful complainer - Ralph Charell, a New York television executive, claims to have been successful in collecting for every misadventure that has damaged him. His total receipts in settlements for such complaints as poor telephone and car rental service, gas and electric overcharges failure to deliver on time, imperfect goods, improper installation, landlord disputes, and the like, have come to \$75,591.22 as of July 24, 1973---and he is still complaining!

The upside down record - The longest period of time for which a modern painting has hung upside down in a public gallery unnoticed is 47 days. This occurred to Le Bateau, by Henri Emile Benoit Matisse (1869-1954) of France, in the Museum of Modern Art, New York City, between October 18 and

WILSONWIZNER: HOLLYWOODITSLIKEATRIPTEROUGHASEWERINAGLASSBOTTMEDBOAT!

Just What You were Dying to Know Dept.:

Circus tights are believed to have been introduced in 1828 by Nelson
 Hower, a bareback rider in the Buckley and Wicks Show, as the result of a
 mishap. The performers wore short jackets, knee breeches and stockings,
 but Hower's costume failed to arrive and he appeared for the show in his
 long knit underwear.

The old belief that, if lost, one can at least establish compass direc-
 tions by noting where moss grows on trees and taking this for north is
 false and, in quite a literal sense, misleading. Ironically, it is true
 that on level land in a dry area a tree growing by itself may have moss just
 on the north side. In dense forest or on lowlands, however, moss tends to
 grow on all sides of the tree. The moral seems obvious enough: if one is
 to get lost, he should arrange to do so in open, dry country.

I think that you're one of the chronic bitches, always wanting
something to complain about. (perhaps that's why ARRAKIS is published)

Part of your problem can be traced to :

A. living in a small town (I mean Huntsville is a small town)(Dorset has
some class, but Huntsville!!)

B. an unhappy childhood:(you may think that you've had an unhappy childhood,
but you should ask Smyth about his some time. His was so bad that he had to
leave Two Mountains; where's Two Mountains? don't ask me , ask him) (and
have a box of tissue's on hand.)

C. looking like Dominskyj; now that would be rough.

Golden City: Shit! It's raining like a son of a bitch right now!

Robert lived in Dorset, need I say anything more about that hole in the
ground?

Moscow-Berlin: I thought you wanted to move west, not east! Things are
tough here in bear country. You wouldn't like it at all, so clear out
while you can.
